

WHAT'S THE DIFFERENCE BETWEEN MICRONEEDLING AND DERMAPLANING?

Microneedling is a smart procedure to help with acne scarring, hyperpigmentation, texture and fine lines. It is accomplished using a medical grade device with hypodermic fine needles that oscillate into and out of the skin's surface to promote skin tightening through healing post-procedure. It can also be useful for keloid or hypertrophic scars. Think of it as a way to renew the skin from within. A more advanced type of microneedling treatment with RF (radiofrequency) is also available at our practice, as Secret RF. It helps to achieve more complete results that are longer lasting. Both treatments are best in a series of three treatments. March is a great time for these services!

Dermaplaning is also a great service used to help smooth the skin surface and help with radiance. This procedure safely exfoliates the skin along with removing the fine hairs naturally found on the face. It is often performed after a facial deep cleansing treatment and improves the penetration of skincare products into the skin. Post dermaplaning you may notice your cosmetic products blending into your skin more flawlessly than before, which is just an added bonus! Think of our staff treating you with this service as the icing on the cake!

In the month of March, get 30% off any one skincare product recommended just for you after your microneedling or dermaplaning treatment by one of our medical estheticians. We often suggest one of our tinted mineral sunscreens, Alastin products, or CE Ferulic by SkinCeuticals.

NATIONAL EMPLOYEE APPRECIATION WEEK BEGINS ON MARCH 1ST!

We salute our excellent employees at our practice and are grateful for the way they strive to provide excellent care to our patients. They show up early, stay until the job is done and give their very best. If you are pleased with your care, please notify us because kindness counts!

PRODUCT HIGHLIGHT

SkinCeuticals' C E Ferulic features a synergistic antioxidant combination of ferulic acid and pure vitamin C and E to enhance your skin's protection against environmental damage caused by free radicals. In addition to antioxidant protective benefits, this formula improves signs of aging and photo damage to reduce the appearance of lines and wrinkles while firming and brightening your complexion. Lastly, this powerful formula helps neutralize free radicals induced by UVA/UVB, infrared radiation (IRA) and ozone pollution (O3).

HAVING SKIN LIKE THIS ISN'T JUST LUCK!

- 1 Focus on your goals.
- 2 Stay consistent with your skin care routine- wash, treat and protect your skin twice a day.
- 3 Wear sunscreen daily!
- 4 Schedule your skin exam to address any concerns.
- 5 Think ahead and consider upcoming events, like laser hair removal to get summer-ready skin now!

THE REVIEWS ARE IN!

The staff and doctors at this dermatologist are great. Everyone I have worked with has been kind, knowledgeable and efficient.
